Froughi Steel, Malleable Iron, No Leaky Joints.

No one can say that the time was not ripe for a new furnace. The day of brittle, porous, east iron fulnices are numbered. In everbranch of manufacture cast non is being driven out by wrought non and steel. Every bridge that goes down in a wreck of lives and property is found to have east non member. Every bursting canron which slays its friends rather than its enemies is made of cast iron. Every leaky furnace which porson a household with its noisome gases is found to be made of the same cheap, unreliable material. Improved methods of manufacture have made steel and iron plate, of first quality, less expensive than cast iron formerly was, and it is plainly in accord with progress in other directions that there should be progress both in design and the material of furnaces for warming our homes, churches and schools.

There are Two Distinguishing Characteristics

Which, more than anything else, have contributed to the phenomenal growth of The Chicago Daily News, giving it a circulation larger than that of all other Chicago dailies combined. It seems strange that the first practical, combined application of two such common sense principles in journalism should have been left to a paper as yet only twelve years old. And yet true it is that in this fact lies the real secret of the unparalleled success of The Chicago Daily News. Briefly stated these principles are THE DAILY NEWS First

Is a daily paper for busy people

Of all mankind the people of Chicago and the busy northwest are the Justest. And yet perhaps no just number of peo whose statements in matters of politics can always be accepted one things which make up mo tern civilization And yet, strange to my right here in this great busy north of the "organ"

west, in its lusy metrepel. Chience there has taken thee the creation and descripment of the tracst cumbrous unserviceable, pendent newspaper which give the realer all the news and rives tion is over in million a week.
